PROFESSIONAL SUMMARY

Senior Java Backend Developer with 8 years in IT, including 6+ years specializing in Java backend architecture, delivering scalable, high-performance distributed systems. Core strength in reactive programming with Spring WebFlux and Project Reactor, and building event-driven microservices powered by Apache Kafka, OCI Streaming, and WebSockets, from greenfield design through production deployment on Oracle Cloud Infrastructure. Drives engineering rigor through 80%+ unit and integration test coverage using JUnit and Mockito, with a strong Data Structures and Algorithms foundation for system design. Oracle Certified in Agentic AI Foundations (LangChain, MCP, Vector Databases, Embeddings). Recognized Outstanding Performer (2025) for contributions to architecture, performance optimization, and team collaboration.

CORE TECHNICAL SKILLS

Languages & Frameworks: Java 8, 11, 17, 21; Spring Boot; Spring MVC; Spring WebFlux; Project Reactor

Architecture & Patterns: Microservices, Event-Driven Architecture, REST API Design, GraphQL, System Design, Reactive Programming

Messaging, Streaming & Cloud: Apache Kafka, OCI Streaming, WebSockets, Oracle Cloud Infrastructure (OCI)

Data & Databases: MySQL, SQL Databases - schema design and query optimization

Testing & Tools: JUnit, Mockito, Git, BitBucket, Oracle VBS, Maven, Jenkins Pipeline, IntelliJ IDEA, Eclipse, JIRA, Postman

Agentic AI & LLM Systems: LangChain, Model Context Protocol (MCP), Vector Databases, Embeddings, LLM Fundamentals

Other: Distributed Systems, Caching Strategies, Pagination, Error Handling, Data Structures & Algorithms

WORK EXPERIENCE

LTIMindtree

Specialist Software Engineer | April 2022 - Present

- Architected and developed production-grade Spring Boot microservices from greenfield, owning end-to-end responsibility from system design and module architecture through core business logic and deployment.
- Built non-blocking, asynchronous services using Project Reactor and Spring WebFlux, enabling efficient utilization of multi-core processors and measurably reducing average API response latency.
- Designed and implemented event-driven microservices consuming real-time messages from Apache Kafka topics and WebSocket streams, applying complex data transformations and publishing enriched payloads downstream.
- Drove code quality culture by enforcing 80%+ unit and integration test coverage using JUnit and Mockito, resulting in fewer production defects and smoother release cycles.
- Designed and delivered RESTful APIs for web and mobile clients, incorporating pagination, caching strategies, and robust error-handling patterns for high availability and scalability.
- Collaborated with frontend and QA teams on full-stack root-cause analysis, reducing mean time to resolution (MTTR) for critical production defects.
- Received the Outstanding Performer Award (2025) for exceptional contributions to architecture, performance optimization, and team collaboration.

Tata Consultancy Services

Systems Engineer | June 2018 - April 2022

- Developed and maintained robust RESTful APIs for enterprise web and mobile applications, ensuring high availability, scalability, and seamless integration across distributed backend services.
- Identified and resolved defects across the full application stack, from UI interactions through backend services to database layers, partnering closely with front-end and database teams.
- Improved application performance through code refactoring and pagination for large dataset queries, resulting in noticeably faster response times and reduced server load on high-traffic endpoints.
- Upheld coding standards and backward compatibility while iteratively enhancing existing features, contributing to a stable and maintainable codebase across multiple release cycles.

EDUCATION

B.Tech, Computer Science & Engineering

Bengal College of Engineering & Technology | 2014 - 2018 | DGPA: 7.9

Higher Secondary (12th)

Bidhan Chandra Institution | 2012 - 2014 | 75.6%

Secondary (10th)

Modern High School | 2012 | 80.56%

CERTIFICATIONS

Oracle Agentic AI Foundations Associate - Exam 1Z0-1157-26, Oracle Certified. Certified in foundational Agentic AI concepts covering LangChain, the Model Context Protocol (MCP), embeddings, and vector databases.

ACHIEVEMENTS & AWARDS

- Outstanding Performer Award - LTIMindtree (2025): Recognized for exceptional contributions to system architecture, performance optimization, and cross-functional team collaboration.
- Super Crew Award - LTIMindtree: Received almost every quarter for consistent performance.
